Winter Storms in Texas Delay Vaccine Shipments, New Appointments

[Widespread winter storms across the U.S.](#) have delayed vaccine shipments and deliveries planned for this week. The severe weather disrupted service at both FedEx and UPS package hubs in the Southern U.S., which serve as vaccine shipping hubs for several states.

Unfortunately, Marin County was among the many jurisdictions impacted by delayed shipments. Marin County Public Health was forced to reschedule some first and second dose appointments scheduled for February 18-19 after a shipment of Moderna doses failed to arrive due to storm-related delays. In addition, some Marin vaccine partners, including Rite Aid and Safeway pharmacies, have been affected by vaccine shipment interruptions.

At this time, there is no confirmation as to when the delayed shipments will arrive in Marin. Until that date is known, Marin County Public Health is unable to release new appointments for the week of February 22. However, we are committed to quickly distributing the vaccine supply as soon as it arrives. We will update our [vaccination options webpage](#) with information on when the appointments will be available as soon as we can. Thank you for your understanding.

Drive-Through Vaccinations Coming to Marin

A new drive-through vaccination location will soon open in Marin County, providing easier access to a [COVID-19 shot](#) for older adults and other Marin residents who cannot navigate walk-through

The drive-through clinic will be located at the **Larkspur Landing ferry terminal**. Delays in delivery may impact the **“soft launch” on Sunday, February 21,**

Appointments are required and are limited to Marin residents age 65 and older who can show proof of age and residency. **Appointments will for the new site will go live Saturday, February 20, and will be accessible from Marin County Public Health’s [vaccination options webpage](#).**

[1619 is a pivotal date in American history for two reasons](#)

We look to history to help us understand who we are today. Yet history is also an imperfect, often inadequate record of events. Depending on who is depicting the past, certain truths go untold. That is indeed the lesson of 1619, a year that few people understood as significant in American and African-American history until nearly two years ago.

Even though the winter of 2020 was a washout in many ways, in terms of rainfall things were pretty dry. Thanks to an atmospheric river in January and some other later rains however, the wildflower prospect is looking bright. So strap on your mask and hiking boots and take in the kaleidoscopic beauty of Marin's hillsides in all corners of the county. Whether you're seeking a butt-burning climb or a family-friendly stroll, here are a handful to get you started. Detailed maps of hikes like these and more can be found online via [One Tam](#) and [AllTrails](#), among others.

[Flying Cars Will Be Here By 2022? World's First Flying Car Gets Approval For Takeoff By FAA](#)

When we think of movies predicting future tech, we almost always think of a futuristic society where cars zip past the skies. In recent years we've seen more innovations featured in science-fiction come true than ever before and now, we're about to witness flying cars. The Federal Aviation Administration in the U.S. has greenlit what could be the world's first flying car. The land-air hybrid

Adventures with Dad

A graphic artist living in Germany works from home.

His wife leaves their baby girl with him each day as she goes off to work.

A few months ago, he got tired of her texting to check on how he was doing with the baby. So, he started photoshopping responses to text back to her, and it has become a worldwide Instagram sensation.

Here are a few of them.

[29 Legendary Scientists Came Together in the “Most Intelligent Photo” Ever Taken](#)

How many geniuses can one room hold? In 1927, 29 of the world's most brilliant minds gathered in Brussels for the Fifth Solvay Conference. Convened by Belgian chemist and industrialist Ernest Solvay, the theme of the conference that year was “Electrons and Photons”—topics of contention in the newly developed theories of quantum mechanics. Among the group were Nobel laureates and professors holding esteemed university chairs, including legendary names such as Marie Curie, Albert Einstein, Niels Bohr, and Erwin Schrödinger. Together, the attendees gathered for what has been [called](#) “the most intelligent photo” of all time—a simple snapshot taken at one of the most exciting moments in scientific history.

[Escape to another universe at these amazing stargazing spots](#)

Living in towns and cities, few of us get to see the true beauty of **the night sky**, unpolluted by artificial light. In 2021 and beyond, **celestial escapes** will be in high demand, as people seek time in the wilderness as an antidote to the stresses and strains of modern life. It may be hard to believe but there are places in the world where, after dusk, it is possible to read by starlight and to see your shadow in the light of the moon. Here are six...
