~ At local taverns, pubs, and bars, people drank from pint and quart-sized containers. A bar maid's job was to keep an eye on the customers and keep the drinks coming. She had to pay close attention and remember who was drinking in 'pints' and who was drinking in 'quarts', hence the phrase minding *mind your P's and Q's*.

Lady Liberty has a sister, and she's very wee.

France is sending the US a *second* Statue of Liberty, this time to display on Ellis Island. Mini-Liberty is just shy of 10 feet tall — that's about one-sixteenth the size of the original torch-bearer. The two statues are not twins, but they are identical in most features: Little Liberty, built in 2009, was created with the original plaster model from the 1870s. That makes her 12 years old — a mere tween!

Like the senior Liberty, the hip, young statue wears a seven-pointed crown to represent a shining sun and stands above broken shackles and chains, which symbolize the abolition of slavery in the US. The original Liberty's "little sister" will spend only a few days on New York's historic island before she's returned to the National Museum of Arts and Crafts in Paris, so if you're a New Yorker who's a fan of the bigger Lady Liberty and the tenets of freedom and equality, check her out before she heads back overseas.
